EDUCATION & CERTIFICATIONS

Ekiti State University February 2021 – September 2026
Bachelor of Engineering in Computer Engineering • GPA: 3.20
Ado-Ekiti, Ekiti State

WORK EXPERIENCE

Frontend Developer Intern - Codveda Technologies / Chandrapur, India April 2026 – May 2026

- I assisted in building and refining application features, debugging issues, and enhancing overall project functionality while gaining practical experience with modern development workflows and tools.
- I optimized application performance by improving code efficiency, integrating and working with APIs, and ensuring smooth data flow between frontend and backend services.
- I contributed to the development and improvement of software solutions by applying full-stack development practices, collaborating on assigned tasks, and implementing clean, maintainable code.

Frontend Developer - Hosté Technology / Lagos,Nigeria July 2026 – Till Date

- Developing responsive and scalable admin dashboard interfaces for Hosté Technology using Next.js, TypeScript, Tailwind CSS, shadcn/ui, Zustand, Zod, and TanStack Query.
- Implementing reusable UI components and structured frontend architecture to support efficient and maintainable application development.
- Collaborating with the development team to translate product requirements and designs into functional, user-friendly dashboard features.
- Integrating frontend interfaces with backend services and APIs while implementing form validation, state management, and responsive user experiences.

PROJECTS

AI-Powered Task Manager github.com/SAMCOM-07/task-manager May 2024 – Present
React, Typescript, TailwindCss, Node.js, Express.js, PostgreSQL

- Built a full-stack productivity platform for managing tasks and user workflows with secure authentication and scalable backend architecture.
- Implemented RESTful APIs and optimized application architecture to improve maintainability, performance, and support future SaaS expansion.
- Developed task management APIs, email verification, password reset flows, notification systems, and database-driven features using a modular feature-based structure.

Omnishop Ecommerce Website github.com/SAMCOM-07/omnishop
Next.js, Typescript, TailwindCss, Cloudinary, Firebase

- Built a full-stack e-commerce platform featuring product discovery, user authentication, cart management, and order workflows with a responsive and optimized user interface.
- Integrated Firebase services for backend functionality, including authentication, database management, and real-time data handling while implementing scalable application structure and performance-focused

development practices.

SKILLS

Programming Languages: JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express, TailwindCSS

Developer Tools: VS Code, Git, Zustand, Zod, TanStack Query, PostgreSQL, GitHub Actions, Vercel, Render

ACHIEVEMENTS

- Completed a Frontend development internship at Codveda Technologies, contributing to web development tasks, API integration, and application performance improvements.
- Built reusable and maintainable application structures using modular architecture, authentication systems, database solutions, and modern development workflows.
